**Examiner's Detailed Office Action**

1. Claims 1-6 are allowed.

**REASONS FOR ALLOWANCE**

2. The following is an Examiner's statement for reasons for allowance:
3. Claims 1-6 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claim(s).
4. The limitations recited in independent claim 1 "A method of spatially coordinating Computer Aided Design (CAD) files representing two-dimensional views of an object, comprising the steps of: creating a master dimensional plan file to which said CAD files are spatially located in two-dimensional working space as reference files; linking at least one of elevation, section, and detail files of said CAD files to said master plan file with the coordinates of said master dimensional plan file in said two-dimensional working space for display; linking concentric parallel shapes corresponding to respective z-axis coordinates of the object about an x-axis and y-axis representation of one z plan of said object so as to identify all points on all elevations intersec-

ting the z-axis coordinate of the respective shape, whereby each concentric parallel shape defines a plane in the z-axis dimension for the object in said two-dimensional working space for display and allows for the illustration of the passage of said plane through all elevation, section, and detail files referenced to said master dimensional plan file including said z-axis dimension; linking each selected elevation, section, and detail of said CAD files to the corresponding x, y and z coordinate positions of said master dimensional plan file in two-dimensional working space; and displaying each said selected elevation, section, and detail files of said CAD files at the corresponding x, y, and z coordinate positions of said master dimensional plan in a display plane of said two-dimensional working space.”

5. The limitations recited in independent claim 5 “A method of moving amongst multiple Computer Aided Design (CAD) files representing different views of an object, comprising the steps of: adding switch file icons to CAD file views of the object, the switch file icons representing known architectural graphics symbols; linking the switch file icons to an appropriate related CAD file based on the architectural graphics symbol of each switch file icon; and switching the displayed CAD file view of the object upon selection of a corresponding switch file icon.”

6. The limitations recited in independent claim 6 “A Computer Aided Design (CAD) software program that creates and stores a plurality of CAD files representing two-dimensional views of an object and enables an operator to view said plurality of CAD files representing two-dimensional views of said object, said CAD software program further comprising: macro programs that open associated CAD files related to an object selected by the operator; and switch file icons selectable by the operator to initiate said macro programs to open associated

Art Unit: 2129

CAD files to view CAD file two-dimensional views of the object, the switch file icons representing known architectural graphics symbols and being linked to the associated CAD files based on the architectural graphics symbol of each switch file icon, whereby the operator may switch the displayed CAD file two-dimensional view of the object upon selection of a corresponding switch file icon without knowledge of the name of the CAD file for the new CAD file view.”

7. When taken in context the claim(s) as a whole was/were not uncovered in the prior art i.e., the dependent claims are allowed as they depend upon an allowable independent claim.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments regarding Statement of Reasons for Allowance.”
